Project Report: Digital Literacy Portfolio

Course Code: CSE0001

Course Title: Digital Literacy

Name: Ankur Mishra

Reg No.: 25BCE11174

Branch: B.Tech CSE Core

Year: First Year

Date: 30 March 2026

1. Introduction

In my role as a Student Digital Ambassador, I have developed this Digital Literacy Portfolio to assist my peers in navigating the complexities of the modern digital landscape. This project aims to demonstrate proficiency across five key areas: visual communication, professional branding, technical collaboration, formal communication, and cybersecurity awareness. By building a centralized GitHub repository, I am establishing a professional foundation that will support my academic and career goals over the next four years.

---

2. Task 1: Digital Literacy Awareness Infographic

Tool Used: Canva

Description: I created a visual resource covering the definition of digital literacy, essential digital tools, and safe internet practices. The design uses a three-column layout with high-contrast icons to ensure the information is scannable for students.

Reflection: The most interesting part of this task was learning how to condense complex topics like "Digital Ethics" into a single visual point. I found it challenging to balance the amount of text with white space to maintain a professional look. This exercise taught me that as a Digital Ambassador, clarity is just as important as the information itself.

---

3. Task 2: Build Your Student Digital Portfolio

Platforms Set Up: GitHub, LinkedIn, and Kaggle

Purpose: These platforms were chosen to build a professional identity that is visible to employers and the academic community. On GitHub, I initialized a profile README to introduce my technical interests. On LinkedIn, I documented my current education at VIT Bhopal to begin networking with industry professionals.

Future Plans: Over the next four years, I plan to use GitHub as a repository for all my coding projects and LinkedIn to track my professional milestones and certifications. Kaggle will be my primary tool for practicing data science outside of the classroom.

---

4. Task 3: Exploring Coding & Collaboration Platforms

Platforms Used: HackerRank and Google Forms

What I Built/Practiced: I completed the "Solve Me First" challenge on HackerRank to practice basic problem-solving logic. Additionally, I developed a 5-question Digital Literacy Awareness Quiz using Google Forms to engage my batchmates.

Reflection: These tools are vital for academic collaboration. Google Workspace allows for seamless group project management, while coding platforms like HackerRank prepare me for technical interviews. Mastering these now ensures I am "placement-ready" in terms of my technical workflow.

---

5. Task 4: Professional Email & Etiquette

Communication Scenarios: I drafted two professional emails: one requesting a deadline extension from a professor and another expressing interest in a summer internship.

Key Learnings: I learned that professional communication relies heavily on a clear subject line and a respectful tone rather than long-winded explanations. A hypothetical situation where a student sent an overly casual email to a recruiter showed me how poor etiquette can lead to lost opportunities. This task reinforced that every digital interaction contributes to one's professional reputation.

---

6. Task 5: Cybercrime Awareness Case Study

Case Study Topic: Phishing and UPI Fraud

What Surprised Me: During my research, I was surprised by how sophisticated phishing emails have become, often perfectly mimicking official bank communications. I also realized how vulnerable users are to UPI fraud if they do not verify the "Request Money" prompts.

Personal Habit Change: As a result of this research, I have committed to never clicking on links in unsolicited SMS messages and have enabled Two-Factor Authentication (2FA) on all my financial accounts. I also saved the National Cyber Crime Helpline number (1930) in my contacts.

---

7. Conclusion

This project has provided me with a holistic understanding of what it means to be digitally literate in 2026. From securing my online accounts to building a professional brand on LinkedIn, I have gained practical skills that go beyond basic computer use. As a Student Digital Ambassador, I feel better equipped to guide my peers toward safer and more professional online habits.
